## Registration, Evaluation, Authorisation and Restriction of Chemicals Declaration

The European “REACH” Regulation N°1907/2006 on the Registration, Evaluation, Authorisation and restriction of Chemicals entered into force on 1 June 2007. While setting new rules for the management of chemical substances, REACH leads to the need for more communication between customers and suppliers on the substances they buy and sell.

Certain substances have been selected and listed and issued in the “candidate list” by European Chemicals Agency (ECHA) as Substances of Very High Concern (SVHC). The intent by the Reach Directive is to substitute these chemicals when suitable alternatives have been identified.

With this document SVENSKA HELAG AB confirms:

- All Chemicals, substances, articles and packaging to be delivered by HELAG to the buyer comply with the REACH Regulation requirements.
- Aware of the obligation in REACH
- Undertake to follow-up the REACH SVHC candidate list with new substances that may be added to the candidate list. Automatically inform the buyer without any delay of any changes in the contents in new and existing goods or their packaging relevant to REACH Regulation. Including update of 2011-12-19.
- Forward the knowledge of the demands in REACH to the supplier’s up-streams supplier.

None of the goods (Substances, components, articles, products, material or packaging) contain any of the substances listed in the “candidate list” above a concentration of 0.1% applied to homogeneous material in the goods.
